

SkyTrack

SAFETY & ASSURANCE 24/7

PERSONAL ALARMS

Manage risk, and
improve the safety of
independent workers

Help independent workers stay safe, and feel safe

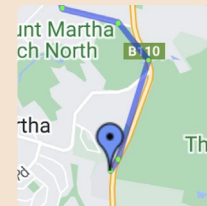

It's not always hazardous to work alone, but circumstances can change rapidly.

SkyTrack helps your team stay safe. And when needed, help is available at the press of a button, 24/7.

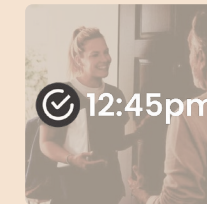

How SkyTrack keeps workers safe

1/ Independent workers wear a small Personal Alarm device that works over Telstra's mobile network.

2/ The device tracks their location and movement. This data is recorded and available online.

3/ Optional automated welfare checks help the worker communicate their status regularly.

4/ In the event help is needed, the worker is contacted by Control Room operators who contact security or emergency services.

Safety & Assurance 24/7
